

Marcel Chenier

SVP of Engineering

Marcel was most recently Engineering Program Leader for the Wi-Fi and Small Cell Solutions products at Ericsson. Prior to Ericsson, Marcel was vice president of engineering at BelAir Networks, a company acquired by Ericsson. Prior to BelAir, Marcel was head of engineering at Zhone Technologies Canada from early company stage to IPO. As VP of R&D for Premisys, Marcel was part of the leadership team that lead the acquisition by Zhone. Marcel spent 16 years with Nortel Networks working on research and development as an R&D Executive. Marcel is a co-inventor on several patents in the area of wireless networking architecture. Marcel has a Bachelor in Electrical Engineering from University of Ottawa (Canada).
